

Biology 211 Laboratory Exercises Bellevue College

Contents

- Data Analysis
- Data Analysis Case Study: Effect of Neurotoxin Pesticides
- Doing Science
- Microscopes
- Cells and Cell Structure
- Cell Fractionation
- Membrane Properties
- Osmosis
- Enzyme Activity
- Aerobic Cell Respiration and Fermentation
- Yeast Respiration Rate
- The Effect of Temperature on Animal Respiration Rate
- Leaf Pigments Absorption Spectra
- Leaf Structure and Function
- Photosynthesis
- Light-Dependent Reactions of Photosynthesis
- Mitosis and the Cell Cycle
- Meiosis and Life Cycle Patterns
- Mendelian Inheritance in Corn
- Cat Coat Genetics
- Human Inheritance Patterns
- Polytene Chromosomes
- Detecting Cancer Genes
- Human B-globin (Hemoglobin) Activity
- Transformation of *E coli*
- Plasmid Mapping

Helpful Materials

- Writing a Lab Report
- Using the Data Recorders
- Using the Spectrophotometer
